

The logo features a stylized red 'V' with a white outline, followed by the word 'MAX' in a bold, black, sans-serif font with a white outline. A registered trademark symbol (®) is located at the end of 'MAX'.

V-MAX®

The Power To Clean Big

One Fleet, One Wash,
V-Max Cleans Them All!

BELANGER 

DRIVE | CLEAN

Simple, Efficient, Automatic Wash Solution

With Belanger's V-Max® large vehicle wash, 'one wash fits all' the vehicles in your fleet – from work trucks to transit buses – and everything in between, including Gradalls, dump trucks and even backhoes! As a severe-duty touchless wash, the V-Max is built to deliver millions of reliable wash cycles, cleaning vehicles of all shapes and sizes in just three to six minutes each. Its 100% damage-free design provides safe cleaning of every vehicle surface, including attachments like ladder racks and light bars.

100% Damage Free

With its touchless wash format, the V-Max cleans work trucks and other municipal vehicles 100% damage-free. In fact, the V-Max can wash any vehicle that can fit in the wash – making the V-Max the 'perfect fit' for any facility manager who needs to wash a mixed fleet.

Dual Arms Save Time And Water

To achieve faster cycle times, the V-Max sizes each vehicle for length, bringing its dual wash arms around the front and rear with an efficient 'butterfly' action. Unlike fixed-arch rollovers, the V-Max dual-arm design delivers a powerful clean using just 72 gallons per minute – less than a quarter of the water required by some touchless competitors!

You're In Control

V-Max is the only large vehicle wash system that lets you program up to four different wash packages, with a variety of options, at one time. With V-Max's HMI unparalleled program versatility, these packages can be selected at the time of the wash by the vehicle driver or through an onsite attendant. The washes can also be monitored off-site, via the internet, so you can track frequency of washes and types of wash packages selected.

Built For 24/7 Severe-Duty Use

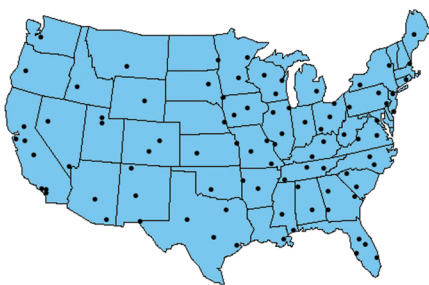

While other large vehicle washes are 'fleet duty' designs capable of providing only 250,000 to 300,000 washes over five to seven years, the V-Max is built to deliver millions of reliable wash cycles over its lifetime. That's because it utilizes a simpler design, with fewer moving parts and premium materials like aircraft-grade aluminum, durable high-density plastics, and greased-for-life bearings.

'World-Class' Support Starts With Your Local Service Provider!

Let's face it – vehicle washing is not your core business. Yet you need a reliable, cost-effective way to keep your fleet clean – to protect your investment, and promote your image to riders and the public. Your solution starts with thoughtfully designed, well-made wash equipment – and continues with a manufacturer who will be there for you before, during and after the sale.

In order to keep your wash running – and your buses looking their best – Belanger has established an extensive network of experienced, professional service providers that cover North America and select global locations. These providers understand vehicle washing, are factory trained and authorized to service your equipment, and are available for quick response in your area, whenever you need them.

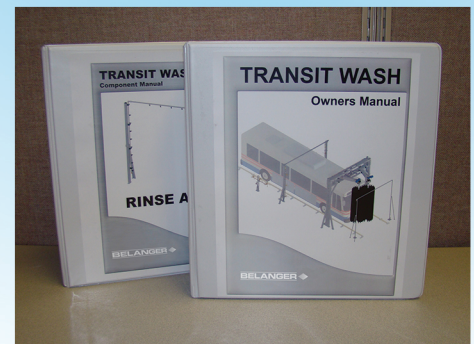

These service providers often stock commonly-needed parts to expedite service and keep you washing. When you need a less common part, the Belanger aftermarket parts team stands ready to assist you. And in case you ever need a part for out-of-production Belanger wash equipment, we will make brand new parts to fit – based on our extensive archive of parts prints. That's our *lifetime* commitment to you!

Belanger maintains ISO 9001:2015 quality certification, with on-going quality audits at both manufacturing facilities

Knowledgeable factory technicians provide phone-based technical support, with extended "on-call" availability

The industry's best, most comprehensive O&M manuals help ensure you get the most from your wash system investment
